WORK EXPERIENCE

Rightpoint Consulting   **September 2019 to March 2023**

Rightpoint, a Genpact company, is a global total experience leader working to create seamless digital experiences driven by data, insights, strategy, technology, and design. We drive growth by delivering experiences that transform how people, technology, and businesses interact.

Software Developer

Work directly with various Rightpoint clients across multiple domains. Collaborate with developers, designers and stakeholders' teams to craft a solution from kick-off to delivery. Clients range from large scale retail chains, global airlines as well as major financial institutions. All engagements were built within the Agile methodology.

- Member of project team tasked with creating and maintaining components using React and Angular
- Collaborated with Sitecore developers to design project framework
- Used React to convert pages to a new back end API
- Member of a three-person team that was tasked with designing and building all HTML elements
- Wrote tests to meet the client's project wide 80% testing requirements
- Created components with Lottie animations
- Used Pano2VR to create a virtual tour experience with a client managed CMS

EDUCATION:

- Rochester Institute of Technology (RIT), Rochester, NY Game Design and Development major
